Conservation Congress Resolution

The Problem:

The current 2006 muzzleloader season opens November 27 and closes December 6 lasting 10 Days. The current muzzle loading season format only covers 1 weekend of hunting. To provide more opportunity, for people to hunt during the muzzle loading season. I would like to extend the muzzle loading season an additional 7 days

At present, the current season format has muzzle loading season starting the first Monday after the Sunday closing of the 9 day gun deer season and lasts 10 days, only covering 1 weekend. By extending it 7 days you will cover 2 weekends of hunting.

Solution:

Extend the muzzle loading season from 10 days (1 weekend), to 17 days to cover 2 weekends of hunting.
